

# Stimulus Projects Update

- Stimulus funds will be coming through the various federal and state agencies.
- City departments have funding relationships with most of them and will keep in communication with those agencies to identify potential funding resources for the City of Wichita.
- The City Manager will have those assigned departments/individuals for each funding category to review in detail and communicate the application criteria/process to the responsible department or local agency. Staff will monitor the stimulus bill and direct grant opportunities accordingly.
- Scott Moore, Terry Cassady, and the Development Coordination Committee (DCC) have been assigned to coordinate a Stimulus Bill Review Process that will streamline our coordination in reviewing and applying for those stimulus funds. Department heads would be called upon to assist where needed.
- The CMO will provide bi-weekly updates to the City Council on what the departments are learning and coordinating for City Council consideration.
